Characteristics of the company

We are a Dutch company providing jobs for qualified people at third clients or our own projects in The Netherlands. We focus onto these fields of work: industrial electro installations, metal (welding/pipefitting/CNC machining), plumbing (water/heating/gas/fire protection), other installations (flanges, air ducts,..) and specific building professions.

We are not a matching or sourcing agency, we are the end employer that provides everything from contracts, salaries, accommodations to online and personal support in The Netherlands. Half of the team is located in 4 branches in NL and half in Slovakia.

With over 15 years experience, we offer only updated and verified projects with verified clients with paid accommodation, where we always strive for one persons rooms and fully equipped homes for all our employees. It is not about quantity, but about the quality and good teams of people.
